TWO BROTHERS RACING COMP-S 2-INTO-1 EXHAUST SYSTEMS

Two Brothers Racing 2-into-1 exhaust systems are designed to deliver maximum torque. They feature race-inspired stainless steel headers that shave pounds off the competition to ensure a long lasting, weather-resistant, amazing sounding exhaust. Exhausts come complete with heat shields. From the engine, the exhaust flows through our 1 3/4" stainless tubing which includes O2 bungs to accommodate both stock and 18mm sensors. From here the exhaust steps up to 1 7/8" before dumping into the spring retained collector for increased torque. The exhaust then emerges from the collector into a 4" diameter muffler to deliver an unparalleled sound upon exit. Competition-S exhausts feature removable end caps in aluminum or carbon fiber.

TWO BROTHERS RACING "BALANCED LOOKS" 2-INTO-1 EXHAUST SYSTEMS FOR TOURING

Two-into-one exhaust systems for those who like to retain the balanced looks of a 2-into-2 system. The right side muffler is part of the exhaust system whereas the left side is a non-functional "Ghost" muffler. Designed to deliver maximum horsepower, torque and superior sound, the TBR Touring 2-into-1 with Ghost pipe now has the looks to match the attitude. The race inspired stainless steel headers shave pounds off the competition and are designed to ensure a long lasting, weather-resistant, amazing sounding exhaust. Headers are ready to accommodate both stock and 18mm Wide Band O2 sensors and are finished with color matched heat shields. Headers from this system flow exhaust gas into a spring retained collector then into the popular 4" Touring muffler which spiral perforated core to deliver an unparalleled sound upon exit. The Ghost pipe on the left side utilizes the OEM heatshield and gives the bike the style and balance to match the performance.

Fits all 2017 to present Milwaukee Eight Touring models

Note: European 2021 to present models (Euro-5) require eliminators for the rear O2 sensors ZPN 744444
