## VSTREAM REPLACEMENT WINDSCREENS FOR TOURING MODELS

National Cycle's innovative VStream Windscreen gets its name from the unique shape and dimensional contours designed and engineered into the windscreen. The patented "V" profile helps push the turbulent wind out and away from the side of the rider's head, producing a quieter and more comfortable riding experience for both the rider and the passenger. VStream Windscreens are designed specifically for each model bike to ensure optimum performance and perfect fit using the OEM mounting hardware. Windscreens are made from the finest windshield material in the world, 4.0mm thick Lexan polycarbonate. This material is 20 times more impact resistant than acrylic or other plastic windshields, reason why National cycle gives a 3-year warranty against breakage. Additionally this polycarbonate features National Cycle's exclusive Quantum coating. This provides 10 times better scratch resistance than any other windshield material on the market. The Tall and Standard sizes are outstanding high-speed highway performers for FLHT/FLHX riders. Enjoy a significant improvement in wind management and riding comfort. If you want a custom look and a lower profile, you will like the performance of the VStream models in Low or Ultra Low. Height is measured from the bottom to the top on the center of the screen.

## CRASH/HIGHWAY BARS FOR HARLEY-DAVIDSON

Beautiful Chrome plated Highway Bars feature heavy gauge diameter tubing with smooth, even Mandrel bends for show-quality appearance. These bars will give the typical Big Twin look to any Harley-Davidson and are a perfect match with the rear highway bars. Come complete with mounting hardware and instruction sheet for a quick and easy bolt-on installation. Mounting the rear highway bars as well will give the 50's Panhead look to your Harley-Davidson.

**Note:** 1990 Thru 1992 Heritage Softail Classics (FLSTC) require the installation of ZPN233558 bracket kit to replace the original Equipment brackets which attach the saddlebag support frame to the foot peg bolt. Additionally neither of the toolbox kits may be installed because of contact with the saddlebag support frame.
